Zeichenkonkordanz

“Zeichennamen” bzw. Lautwerte, die bei Borger, Mesopotamisches Zeichenlexikon (Münster ²2010), nicht aufgeführt sind, werden in eckige Klammer gesetzt (z. B. SIG₅ mit den Lautwerten [GURUM_x] und [SAGA]; [ÚR_xA]).

Wenn Formen nur einmal belegt sind, ist die konkret vorliegende Transliteration vollständig wiedergegeben, d.h. einschließlich der Markierungen des Erhaltungszustandes (z.B. a-du-^rdu[?]-e).
