Editionsprinzipien

Die Datensätze weisen ein einheitliches Format mit 4 Feldern auf:

1. lexikalischer Beleg
2. Kommentar (optional)
3. Zitat
4. Quelle

Die Einträge wurden nicht vereinheitlicht, sondern weitestgehend in der originalen Zitierweise gelassen. In einigen Fällen war es allerdings angebracht, Aktualisierungen vorzunehmen:

- Referenzwerk ist grundsätzlich Borger, Mesopotamisches Zeichenlexikon (Münster ²2010). x-Werte wurden möglichst eingeordnet und überholte Zuordnungen meist aktualisiert. Dies ist mit doppeltem nachgestelltem Asteriskus markiert; die ursprüngliche Darstellung wurde jedoch zusätzlich auch zitiert (z.B. ad-kub₄** statt ad-kub_x und ad-kup₄** statt ad-kup₅).
- Programmtechnisch ist ein einheitliches Transliterationssystem vorausgesetzt. Deshalb waren einige redaktionelle Eingriffe notwendig (z.B. die Angleichung der Markierung von Verbindungen mit Punkt an die üblichere mit Bindestrich: zi-d oder zi(-d) statt zi.d; -a-ni statt -a.ni). In der alphabetischen Einordnung stehen Ĝ nach G, Ř nach R.
